

I am opposed to HR4026. A measure to limit locally-oriented content on satellite radio. Listening to whatever I want is a right of every American and should not be interfered with by NAB. I enjoy the ability of listening to traffic and weather information in a clear and concise manner without all the commercialization involved in regular AM/FM broadcasts. I travel a great deal and enjoy the freedom of choice.

Please vote against HR4026 and reject NAB's petition 04-160.

Thank you.
